Software Engineer Recommendation Letter

To whom it may concern

I'm pleased to write this recommendation letter for Michelle Santos Rieper. I am Markus Schmidlin, Partner and Chief Technology Officer at Optravis. We are a fast-growing technology startup based in Basel, Switzerland. Optravis is a leading provider of SaaS solutions for operational transfer pricing management and tax technology.

Michelle worked for Optravis as a software developer from August 20, 2018, to May 31, 2021. During this time, she worked on different software modules and components, helping our transition from Java to Kotlin and working continuously on performance enhancement to deal with ever growing data volume and traffic. She took charge of one of our biggest clients for which she worked on the design, implementation, and testing of client specific requirements. She later joined the core development team where she was responsible for the design and implementation of complex software modules containing business logic as well as for UI components.

Michelle is well organized and dedicated to providing high quality work. Always full of energy and enthusiasm, she proved to be a valuable asset to the company and a great help in its growth. Demonstrating quick thinking and excellent analytical skills, I always enjoyed discussing and designing new concepts and features with her. Michelle always communicated with clients and her colleagues in a friendly and competent way.

I strongly believe Michelle has great skills and abilities for a software developer position, and I am confident she can meet any challenges you place before her. While we are sad to see her leaving our company, we understand her desire to explore new opportunities and challenges.

Sincerely,
Markus Schmidlin
